

# Keith Hill

Lead CCA

## PROFILE

Looking for an assessor with broad experience across several technical domains, an assessor who believes in teamwork and knows how both government and industry really work? Forty-eight years of work experience across both government and the technology industry. Now retired from full time work with schedule flexibility for local DC area assessments...or any other site in the world.

## PRACTICE AREAS

- Technology supply chain risk
- Cybersecurity
- Semiconductor manufacturing
- Unmanned/uncrewed vehicles

## BACKGROUND

### **Federally Funded Research and Development Center**

17 years of support to many federal agencies and DoD organizations

### **US Military (Reserves, Retired)**

Wide array of uniformed experience across aviation, science, and technology including assessment of military research and labs

### **Commercial Industry**

Managed and contributed to software and networking projects including auditing for both business and government customers

## ASSESSMENT EXPERIENCE

- Audit Manager for a commercial firm supporting a govt agency
- Conducted first cybersecurity assessment for a key US border technology (previous assessments did not include cybersecurity)
- First 800-53 assessments for an independent government agency
- Routine cybersecurity assessments (network, workstation, inventory, etc. using the most advanced criteria at that time (2002-2006)
- Assessment of classified networks using "Rainbow" series
- Test runs of new, evolved, and novel assessment methodologies
- Development of new assessment methodologies
